## HONESTLY PREPARED

Twelve kinds of no-salt added

The best fill & finish there is available

No calcium chloride

No disodium EDTA

No chemical additives

BPA, BPS, & phthalate free can lining

## Authentic Organic Pure EDEN Beans

From families we know and trust since the 1960's. Eden Foods' grower network has used organic methods for decades. Their vital soil teems with life, practiced tending produces the best beans on earth. The purest beans available.

EDEN Beans – soaked overnight. The soak water is discarded. The beans are then pressure cooked with no chemicals added. Doing so makes them taste better, and easier to digest. No other U.S. cannery soaks beans overnight. Sturdier, healthier, long-term organic beans do not require processing chemicals.

Very small green flecks of EDEN kombu seaweed can be seen in EDEN beans. They provide unique amino acids ensuring better taste, digestibility, and a smooth softness.

Kombu helps bring out the great taste of EDEN organic beans, so no salt is needed or added to change their taste.

Whole Grain & Beans provide Complete Protein.
