Purifies and Enriches Soil

Eden Foods saw the value of organic hemp as an additional, beneficial rotation crop to increase organic acreage.

Outdoor Sunshine Grown

EDEN Hemp Flower Extract is field grown outdoors from organic hemp seed in rich organic living soil. Soil vitality is a key factor in the selection of the organic hemp growers.

Cryogenic Extraction

Hemp flowers are harvested from mature plants and dried. Cannabidiol and Cannabigerol are cryogenically extracted from the flowers. The process enables the purity and consistency Eden Foods requires.

Beneficial

EDEN Hemp Flower Extract combines the well-known benefits of hemp seed oil and hemp, which interact with the brain's endocannabinoid system. The endocannabinoid system helps regulate metabolism, anxiety, memory, pain, and well-being.

Potent & Pure

Each batch is third-party tested to ensure the highest purity and potency. Tests were conducted by the accredited Steadfast Labs of Hazel Park, Michigan.

Ingredients Organic Hemp Seed Oil, Organic Hemp Flower CBD, Mixed Tocopherol Vitamin E, Organic Hemp Flower CBG
